Paper 4 Theory (Extended)

February/March 2018

1 hour 15 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams or graphs.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer **all** questions.

Electronic calculators may be used.

You may lose marks if you do not show your working or if you do not use appropriate units.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

This syllabus is approved for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

This document consists of **17** printed pages and **3** blank pages.

1 (a) (i) Fig. 1.1 is a branching key used to identify different species of bacteria.

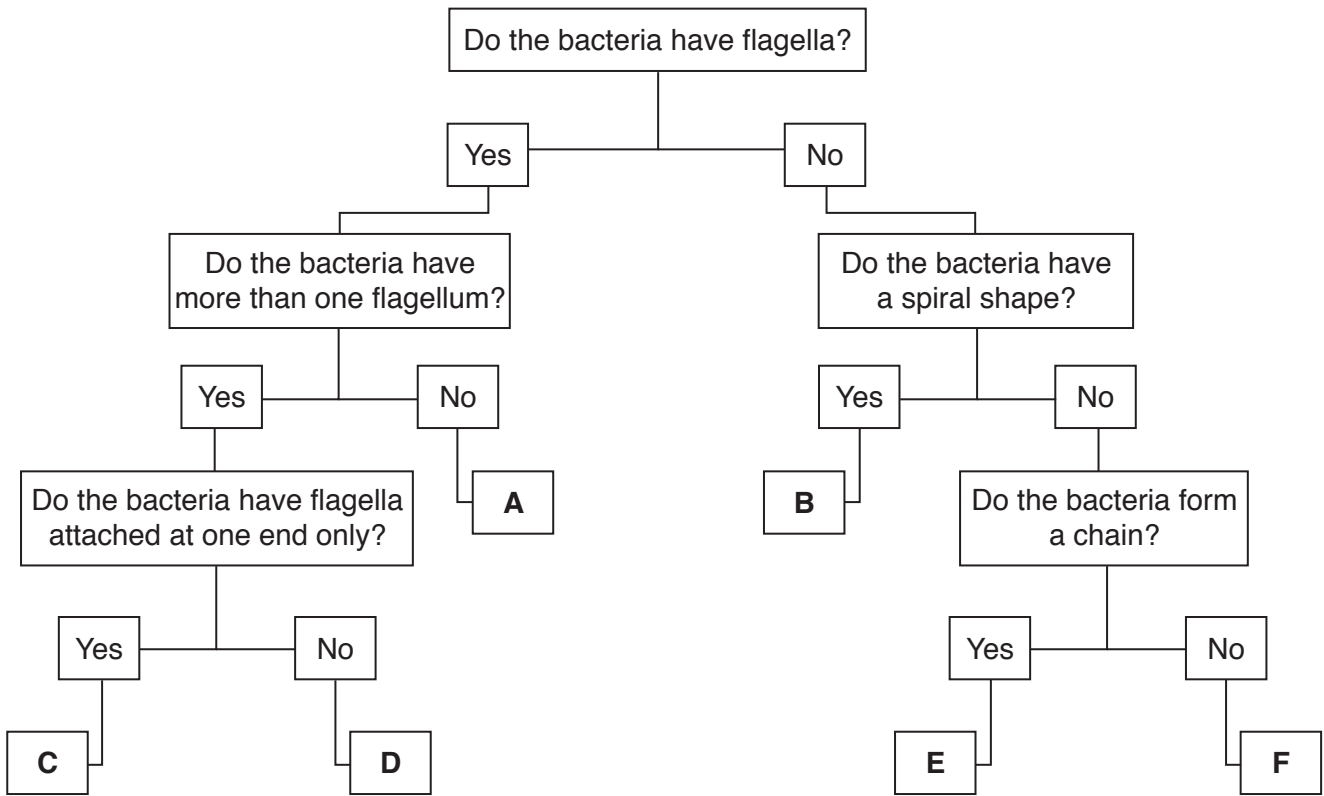

Fig. 1.1

Fig. 1.2 shows six different species of bacteria.

Use the key to identify the six different species of bacteria.

Write the letters on the lines in Fig. 1.2.

Fig. 1.2

[5]

(ii) State the name of the kingdom that bacteria belong to.

..... [1]

(b) State **one** similarity between the structure of bacteria and the structure of viruses.

.....
.....
.....[1]

(c) Fig. 1.3 is a photomicrograph of *Vibrio cholerae*, the bacterium that causes cholera.

magnification $\times 17\,300$

Fig. 1.3

(i) Write the formula that would be used to calculate the actual length of the bacterium (not including the flagellum) in Fig. 1.3.

[1]

- 2 A study estimated the number of people with chronic obstructive pulmonary disease (COPD) in India. Data were collected from two groups of people, those who lived in cities and those who lived in villages.

Fig. 2.1 shows the results.

Fig. 2.1

(ii) State **two** ways in which the composition of inspired air differs from the composition of expired air.

1

2

[2]

(c) Alveoli are well-ventilated to provide efficient gas exchange.

(i) State the name of the muscles that cause the ribs to move during ventilation.

.....[1]

(ii) During inspiration the pressure and volume in the thorax changes.

State these changes.

pressure

volume

[1]

[Total: 14]

- 3 (a) Ecologists studied an area of woodland and estimated the biomass of each trophic level for one of the food chains in the woodland.

Some students wanted to use the data to draw a pyramid of biomass for the food chain.

Table 3.1 shows the students' table.

The students added a column to calculate the width of the bars they would need to draw.

Table 3.1

	trophic level	biomass/g m ⁻²	width of bar/cm
1	producer	120	12.0
2	primary consumer	48	4.8
3	secondary consumer	16	1.6
4	tertiary consumer	2	

- (i) Complete Table 3.1 by calculating the missing value and writing it in the table. [1]

- (ii) Using the information in Table 3.1, draw a pyramid of biomass.

Label each bar with the trophic level.

[3]

- (b) A type of organism gains energy from waste organic material from all trophic levels.

State the name of this type of organism.

.....[1]

- (c) (i) Outline how organisms in the first trophic level of the woodland food chain produce biomass using energy from the Sun.

.....
.....
.....
.....
.....
.....
.....
.....
..... [3]

- (ii) Explain why the fourth trophic level has the least biomass in this food chain.

.....
.....
.....
.....
.....
.....
.....
..... [3]

- (d) The woodland is a conservation area.

Outline the possible benefits of conserving this specific area of woodland.

.....
.....
.....
.....
.....
.....
.....
..... [3]

[Total: 14]

4 Fig. 4.1 is a diagram of the human female reproductive system.

Fig. 4.1

(a) Complete Table 4.1 to show the letter and the name of each of the structures that perform these functions.

Table 4.1

function	letter	name
releases oestrogen		
site of fertilisation		
site of implantation		
dilates during the process of birth		

[4]

(b) Fertilisation is the fusion of the nuclei of a male gamete and a female gamete resulting in a zygote.

State the number of chromosomes present in a human:

female gamete

zygote

[2]

(iii) Complete the sentences about the spread of STIs.

STIs are transmitted through the transfer of during sexual contact. One way individuals can avoid the spread of STIs is to use a type of contraception. One example of this type of contraception is

[3]

[Total: 14]

(iii) Explain how 2,4-D acts as a weedkiller.

.....
.....
.....
.....
.....
.....
.....
..... [3]

(b) Auxin causes the shoots of a plant to grow away from gravity.

State the name of this response.

..... [2]

[Total: 11]

6 (a) Define the term *chemical digestion*.

.....

.....

.....[2]

(b) A student investigated the activity of the digestive enzyme pepsin.

Fig. 6.1 shows the apparatus used in the investigation.

Fig. 6.1

The appearance of the four test-tubes was recorded at 0 and 5 minutes.

The protein in the egg white solution gives the solution a cloudy appearance.

The cloudy appearance clears when the protein in the egg white solution breaks down.

Table 6.1 shows the results.

Table 6.1

test-tube	contents	appearance at 0 mins	appearance after 5 mins
1	egg white solution, pepsin	cloudy	less cloudy
2	egg white solution, pepsin, hydrochloric acid	cloudy	clear
3	egg white solution, boiled pepsin, hydrochloric acid	cloudy	cloudy
4	egg white solution, hydrochloric acid	cloudy	cloudy
